

Do You Know Where to Begin?

» Start Your IT Projects with Our Assessments

Did you know that our talented engineers hold more than 500 active technical certifications? We draw upon this technical expertise to design and deploy custom, innovative solutions to help you solve your most complex IT challenges. Our solutions include server virtualization, virtual desktop infrastructure, storage optimization, unified communications, and much more. However, the first step is to back up and take a look at the bigger picture. Begin your next IT project with an assessment to ensure that you get off on the right foot. As part of the professional services we offer, our assessments give you a clear starting point and help you make fact-based implementation decisions with data derived from your own applications and deployed assets. Here are some of our most popular assessments.

SERVER OPTIMIZATION

- Server Assessment

STORAGE OPTIMIZATION

- Storage Assessment

NETWORK OPTIMIZATION

- Network Inventory Assessment
- Network Assessment
- Voice and Video Readiness Assessment
- Cisco CallManager Assessment
- Wireless Site Survey Assessment
- Cisco WAAS Proof of Concept

LIFECYCLE MANAGEMENT

- Virtual Desktop Infrastructure (VDI) Assessment
- Printer Assessment

SOFTWARE SOLUTIONS

- Windows 7 Assessment

Take a Look at the Bigger Picture

SERVER OPTIMIZATION

Server Assessment

With energy costs continuing to rise, now is the time to optimize your resources by implementing server consolidation and virtualization initiatives. Our Server Assessment gives you accurate performance and utilization facts in order to make sound decisions about which servers you should consolidate.

STORAGE OPTIMIZATION

Storage Assessment

It is estimated the average organization is growing their data at over 35% per year. Our Storage Assessment provides easy-to-understand information about your data growth and usage to help you make changes and improvements that accelerate performance and optimize efficiency.

NETWORK OPTIMIZATION

Network Assessment

Is your network up to speed? If your organization is looking to upgrade or expand your network, the first step is to evaluate the capabilities and shortcomings of your existing network. Our Network Assessment gives you a clear view of your network infrastructure.

Network Inventory Assessment

Has your network overgrown its boundaries? Get back in control with a Network Inventory Assessment. We comprehensively document your IT network with a detailed hardware and software lifecycle analysis, in addition to your current network performance.

Voice and Video Readiness Assessment

Making the move to VoIP? Our Voice and Video Readiness Assessment is the first step toward implementing a VoIP solution. By identifying problem areas in your network, we can make recommendations to ensure your IT dollars deliver maximum ROI and the high performance levels VoIP demands.

Wireless Site Survey Assessment

Whether planning a new wireless network, expanding your current coverage, or upgrading an existing solution, a Wireless Site Survey helps you design an efficient wireless infrastructure.

Cisco CallManager Assessment

Is your current Unified Communications solution operating at maximum efficiency? Our Cisco CallManager Assessment provides expert analysis of your current CallManager deployment, offering valuable information to help you make upgrade and expansion decisions.

Cisco WAAS Proof of Concept

As applications become more centralized and users more distributed, Wide Area Network (WAN) performance limitations are becoming more apparent. Our Cisco Wide Area Application Services (WAAS) Proof of Concept (POC) provides a simple and efficient way to design a flexible, powerful Cisco WAAS solution.

LIFECYCLE MANAGEMENT

Virtual Desktop Infrastructure (VDI) Assessment

Desktop virtualization can bring cost savings, ease of management, improved security, and platform independence to your organization. Our VDI Assessment helps you understand your environment's unique storage, server, and network needs in order to pick the right desktops to virtualize.

SOFTWARE SOLUTIONS

Windows 7 Assessment

Cutting-edge, energy-efficient PCs equipped with Windows 7 can help your organization cut costs, boost productivity, and simplify manageability. A Windows 7 Assessment assists your organization in planning for this deployment and ensures a seamless transition to new technology.
