

Stay Connected While Remote with Microsoft Teams

Empower Remote Work to Help Your Team Stay Productive

Microsoft Teams is your hub for teamwork, which brings together everything a team needs: chat and threaded conversations, meetings and video conferencing, calling, content collaboration with the power of Microsoft 365 applications, and the ability to create and integrate apps and workflows that your organization relies on.

Elevate Productivity with Remote Work

As more employees are working from home, remote collaboration is growing worldwide. Discover how your organization can transform collaboration with Microsoft Teams. Stay connected to your team with engaging digital meetings:

- Enable new ways of working
- Accelerate decision making
- Drive digital transformation

Maintain productivity and stay connected with your team by communicating, collaborating, and sharing with Microsoft Teams. Invite everyone you work with to chat, meet, call, and collaborate all in one place, no matter where you are.

Chat from Anywhere

Communicate easily and keep your team in the know. Share your opinion, and your personality. Send gifs, stickers, and emojis in a group chat or in one-to-one messages.

Meet from Anywhere

Instantly go from group chat to video conference with the touch of a button. Teams of 10 or 10,000 can meet in one place, no matter how many places they're in.

Call from Anywhere

Never yell "who just joined?!" ever again. Use Teams calling, Phone System, Calling Plan, or Direct Routing to take the stress out of conference calls.

Collaborate from Anywhere

Never do that frantic, searching-for-files thing ever again. In Teams you can access, share, and edit Word docs, PowerPoint, and Excel files in real time.

Connect with Your Team from Anywhere

Host audio and video conference calls from any device with online meetings in Teams. You can host online meetings—1:1, teams, live events up to 10,000 people—with consistent experiences across platforms.

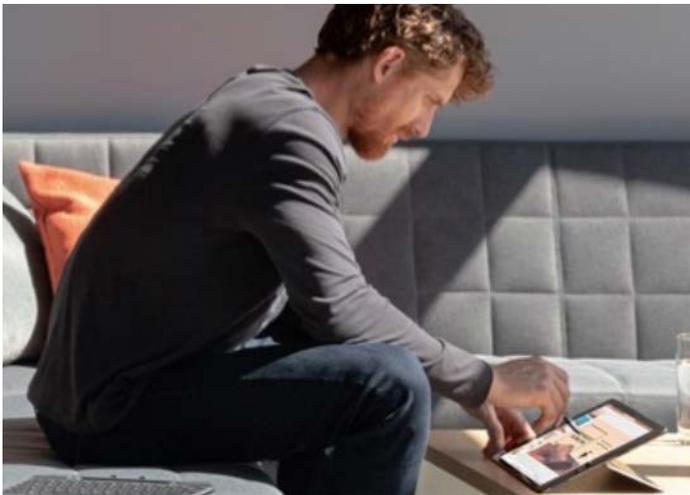

Meet with Intelligence

Make online meetings more effective by sharing context and content and leveraging AI for assistance. Get a secure meeting experience with high-quality audio, video, and screen sharing.

Video Conferencing: Make meetings more personal and encourage teamwork when you virtually meet face-to-face. Meet in any situation, whether you're calling one-on-one, delivering a sales pitch, hosting a team training, or running a company-wide town hall.

Live Events: Hold any meeting live—large meetings, webinars, company-wide events, and presentations with up to 10,000 attendees inside or outside your organization—with Teams live events.

Audio Conferencing: Let people join meetings on the go with a global dial-in number or contact each other directly. All they need is a mobile device and Teams.

Reinvent the Meeting Lifecycle with Microsoft Teams

The meeting lifecycle—from scheduling to follow-up can be difficult to manage. Microsoft Teams meeting solution helps automate the full life cycle of meetings and saves you time so you can be focused and empowered to get more done.

Make Teams Work for You

Add your favorite Microsoft, partner, and custom apps and workflows to your experience.

Integrate the Apps You're Using: Bring the apps and services you love into Teams to create your organization's hub for teamwork.

Build Solutions with Low-code Tools: Develop apps, automated workflows, and dashboards with Power Platform and use them in Teams.

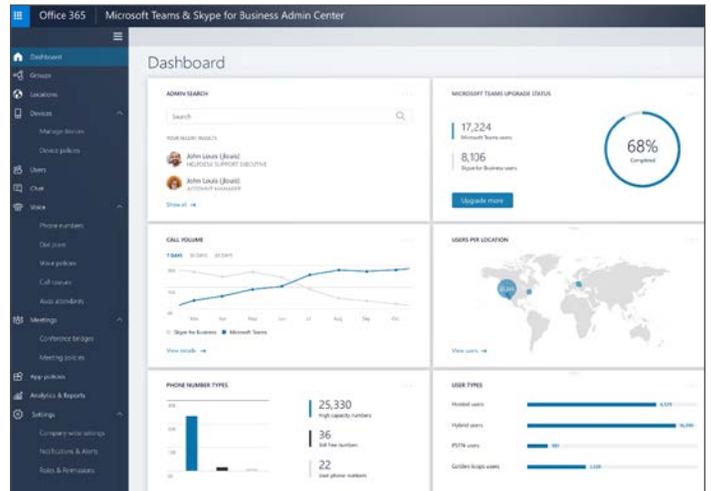

Supercharge Your Solutions: Embed AI and seamlessly connect disparate data sources to unlock the potential of Power Platform.

Create Robust Apps for the App Store: Use the Developer toolkit to build apps for Teams and share them with the world.

Work with Confidence

Collaborate without compromising privacy and security. With Teams, you get built-in security, compliance, and manageability from Office 365 apps.

Now more than ever, people need to know their virtual conversations are private and secure. At Microsoft, privacy and security are never an afterthought. Your data is protected from malware in attachments, accidental sharing via chat or files, and suspicious user activity.

Discover a new way to achieve more together with Microsoft Teams! Contact an Account Manager today for more information.
