

Re-energize your fleet with a modern OS

ChromeOS Flex is the fast and secure upgrade for your school's existing Macs and PCs.

Everyone benefits from a cloud-based operating system.

IT admins can transform existing devices with a modern OS

- Unify new and existing devices with one simple, powerful cloud-based management system
- Configure device policies, control user access, and manage apps remotely with the Chrome Education Upgrade
- Quickly install ChromeOS Flex and download profiles automatically
- Reduce risks with ChromeOS, which has never had a successful reported ransomware attack

Students and educators can get started in minutes

- Simplify the user experience with a unified interface across all devices
- Boot up devices faster, so they're ready when class begins
- Individual user profiles enable easy login across devices and offline capabilities
- Automatic security updates happen in the background—so devices are always protected

How it works

- 01 Try ChromeOS Flex from a bootable USB drive.
- 02 When you're ready, install ChromeOS Flex on an existing PC or Mac.
- 03 Deploy ChromeOS Flex to more devices in your school through a USB drive or network deployment.

ChromeOS Flex can help extend the life of your devices **2–3 times longer** than the lifespan of a typical laptop.¹

1. Business News Daily, 2023.

ChromeOS Flex powers a cost-effective, easy-to-manage, sustainable, and secure learning environment.

Make the most of your existing fleet

- All your devices can run on ChromeOS Flex for a unified teaching and learning experience
- Download ChromeOS Flex at no cost to extend the life of your devices
- Add Chrome Education Upgrade to easily manage your fleet of devices at scale
- Background updates happen automatically, so there's less maintenance for IT staff and more time for other technology initiatives

ChromeOS Flex saves you the cost of buying all new devices for your school.

Gartner predicts **PC prices will increase in 2024** due to component price hikes.²

2. Gartner, 2024.

More than **62 million tons** of e-waste was discarded worldwide in 2022³

3. United Nations, 2024.

Enhance your sustainability efforts

- Reduce e-waste by extending the life of your existing Macs and PCs with a modern OS
- Devices that run ChromeOS Flex consume 19% less energy⁴
- Run devices on the cleanest cloud in the industry—100% renewable energy since 2017

4. Google Cloud Blog, 2024.

Reduce risks with proactive security

- Reduce risks with devices that run ChromeOS, the most secure OS out of the box⁵
- Stay ahead of digital threats with devices that update automatically with 24/7 monitoring, 256-bit encryption, and alerts
- Add Chrome Education Upgrade for advanced security features and visibility

5. Atredis Partners, ChromeOS Competitive Analysis.

Education institutions are the **#1 targeted industry** by cybercriminals.⁶
