

# For the art of teaching and the science of learning

For over a decade, we've partnered with educators around the world to provide institutions with tools that are designed for the needs of school communities.

Experience the difference with Google for Education tools that are:

## Trusted by institutions

**Our tools are built on the safest, most secure cloud.** With Google for Education, educational institutions always have the newest software, the latest security updates, automatic backups, and 24/7 enterprise-grade cyber protection.

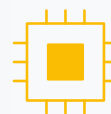

## Tailored for education

**Many of our tools are built with learning science principles in mind** to maximize their impact for you and your students. We incorporate research-based insights on how the brain learns best to ensure our tools are as helpful as they can be for all learners.

## Always evolving

**We provide training and professional development.** Since our technology is always advancing, Google offers no-cost training and resources, from advanced certifications to the global network of Google Educator Groups, so teachers and students can make an impact.

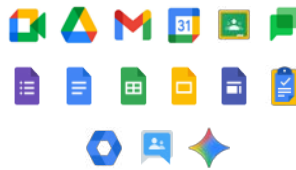

Chromebooks and Google Workspace for Education are **powerful on their own** and **work better together**. Teach and learn with tools that are easy to use and simple to manage—all in a secure environment.

Chrome Education Upgrade

Google Workspace for Education

## Get ready for the future

Take advantage of Teacher Center technology training and resources, prepare tomorrow's workforce with Applied Digital Skills, teach online safely with Be Internet Awesome, and explore Google for Education App Hub to find popular apps and extensions.

## #1 device globally

Chromebooks have been the top device in K-12 education since 2021—with 50 million students and educators using Chromebooks worldwide.

## 170+ million

Google Workspace for Education users

## 150+ million

Google Classroom and Assignments users worldwide

## responsible AI

## Advancing education with responsible AI

Google is committed to making AI helpful for everyone, in the classroom and beyond.

As part of our responsible AI practices, we use a human-centered design approach. We build tools for education thoughtfully and deliberately, and work with a range of experts before bringing AI into classroom tools.

**“Technology alone will not improve education, but it can be a powerful part of the solution.”**

Sundar Pichai, CEO, Google
