

# MICROSOFT 365 E7

Move Work Forward—Without Adding Risk or Complexity

## Microsoft 365

### What's Included in Microsoft 365 E7

#### Agent 365

Governance and Control for AI Agents

#### Microsoft 365 Copilot

AI in Word, Excel, Outlook, Teams

#### Microsoft Entra Suite

Secure identity and Zero Trust access

#### Microsoft 365 E5

Advanced security, compliance, and voice

### BUILT FOR THIS MOMENT

Microsoft 365 E7 brings four essential workloads together in a single, comprehensive SKU—giving organizations the secure foundation to scale AI, govern effectively, and protect critical data.

Microsoft 365 E7 helps organizations break through productivity plateaus, scale AI responsibly, and protect modern work—without adding more tools. Its unified foundation combines Copilot, agents, security, and governance, designed to scale AI safely across the enterprise.

### Why It Matters Now

Work has changed—AI is taking action, employees are distributed, and organizations are expected to move faster without compromising security or trust. Yet many are meeting this moment with disconnected tools and unmanaged AI pilots, creating risk, friction, and stalled outcomes.

Microsoft 365 E7 is built for this new reality, including:

- **Tool sprawl:** Productivity, security, identity, and AI live in silos—driving complexity and user confusion.
- **Expanded attack surface:** Remote work + AI increase exposure across identities, devices, apps, and data.
- **Productivity plateau:** Time is lost to low value work, rework, and context switching.
- **AI without governance:** Easy to pilot, hard to scale safely without visibility and guardrails.

### How Microsoft 365 E7 Changes the Way Work Gets Done

Microsoft 365 E7 brings together everything organizations need to run secure, AI-powered work in a single license.

1. Microsoft 365 E5—Enterprise productivity with advanced security and compliance
2. Microsoft 365 Copilot—AI embedded across Word, Excel, Outlook, Teams, and more
3. Microsoft Entra Suite—Identity, access, and Zero Trust security
4. Microsoft Agent 365—Governance and lifecycle management for AI agents

### A Better Way to Run Your Modern Workday

Microsoft 365 E7 brings productivity, AI, security, and governance together to help organizations:

- Accelerate work with AI embedded where employees already work.
- Innovate responsibly with guardrails that scale.
- Maintain trust with built in visibility, control, and protection.

This isn't about adding technology. It's about creating clarity, confidence, and momentum.

### Modern Work Success Starts with the Right Foundation

Contact your Connection Account Team to schedule a 30-minute discovery to assess E7 readiness and identify where AI can safely drive impact.
