

WHY LENOVO

MAKE THE SHIFT TO WINDOWS 10 PRO WITH LENOVO DEVICES

Bring out the best of Windows 10 Pro with Lenovo's modern devices and the Intel® vPro™ platform.

Windows 7 PCs will no longer receive security updates after January 14, 2020. But, migrating to new devices with Windows 10 Pro is easier than you may think. The OS is intuitive for users familiar with Windows 7 or 8, and it's compatible with 99% of Windows 7 apps. And, when you pair Windows 10 Pro with a modern Lenovo device with the Intel® vPro™ platform and ThinkShield Digital Security Solutions, there's nothing you can't do.

Simplify IT Manageability with Lenovo Devices and Windows 10 Pro

IT administrators estimate up to a 20% reduction in IT management time with Windows 10 Pro. Your team can choose the device that fits them best, set it up on their own, and sign in once for Microsoft services and many apps. Windows Update for Business can automatically keep all your devices up to date with the latest features and security enhancements. Plus, you can keep using many of your current apps and peripherals with Windows 10 Pro.

- With Windows 10 Pro Update, keep systems up-to-date and secure—without interrupting work.
- Run diagnostic scans by yourself, and personalize your system with Lenovo Vantage.
- Let IT admins enforce IT policies centrally with Windows 10 Pro Mobile Device Management.
- Use your Lenovo V-Series AIOs as kiosks with Windows 10 Pro Assigned Access.

Unleash Productivity with Lenovo Devices, Windows 10 Pro and the Intel® vPro™ platform

Organizations enjoy tighter integration with Microsoft cloud services through Azure Active Directory as well as improved mobile device management (MDM). Microsoft also specifically gathered a total of over 200,000 pieces of feedback from users and incorporated them into the redesign to ensure an OS ready for modern productivity challenges.

Make the shift and help employees achieve more, collaborate easier, and stay on track.

2.1x faster multi-tasking*

2.5x better performance*

3x longer battery life*

*Than a 5-year-old Windows PC

Windows 10: Make the Shift

Powered by the Intel® Core™ i7 Processor with the Intel® vPro™ Platform

Lenovo

WHY LENOVO

Protect Your Business with Device Features that Complement Windows 10 Pro Security

Windows 10 Pro is built for comprehensive security from the ground up, with root-level malware protection, integrated data containerization, and support for advanced multifactor authentication. It also integrates easily with secure, certified components and features like fingerprint readers and the full-drive encryption found in Lenovo products.

- Get real-time, cloud-based security with built-in Windows Defender Antivirus.
- Windows Hello and the Intel® Authenticate Solution combine biometrics and other factors like GPS location to restrict device access to only authorized users.
- Self-encrypting Intel Pro SSDs seamlessly integrate with Windows BitLocker, allowing IT to encrypt devices while retaining control of encryption keys. Intel® Remote Secure Erase then also allows IT to securely wipe Intel® Pro SSDs in seconds.
- Physical camera covers* protect you from hackers accessing your camera
- Intel® Hardware Shield protects against attacks on BIOS during boot and operation.
- Enable a more productive and protected business with the new Intel® vPro™ Platform. The Activate Management Technology allows IT to remotely control and repair and rapidly respond to any IT security issues.

The Power of ThinkShield and the Intel® vPro™ Platform

When you combine the power of Lenovo ThinkShield and the Intel® vPro™ platform means you get more than data protection, you get an entire suite of security solutions designed to protect your data, devices, identity, and online experience.

- Intel® Hardware Shield protects against attacks on BIOS during boot and operation
- Intel® Active Management Technology allows for easy remote repairs and responses in the case of a security breach
- Intel® Authenticate enables enforcement of a multi-factor PC login policy

DEVICES SUPERCHARGED WITH WINDOWS 10 PRO

ThinkPad X1 Carbon

Processor: Up to 8th Generation Intel® Core™ i7-8650U with the Intel® vPro™ platform (1.90GHz, up to 4.20GHz with Turbo Boost, 8MB Cache)

Form Factor/Size: Laptop
Starting at 2.49 lb. (1.13 kg), 0.62" thin

Display Size: 14" HDR WQHD (2560 x 1440)
IPS glossy with Dolby Vision, 500 nits

Maximum Memory/Storage: Up to 16 GB LPDDR3 2133 MHz (Onboard)
1 TB Solid State Drive, PCIe-NVME OPAL2.0 M.2

Battery: Up to 15 hours, integrated with 3 cell Li-Ion 57Wh with Rapid Charge technology

Why this Device? Legendary durability and seamless responsiveness in an ultralight package

ThinkPad T490s

Processor: 8th Generation Intel® Core™ i7-8565U with the Intel® vPro™ platform (1.80GHz, up to 4.60GHz with Turbo Boost, 4 Cores, 8MB Cache)

Form Factor/Size: Laptop
Starting at 2.81 lbs (1.27 kg), 0.63" thin

Display Size: 14" HDR WQHD (2560 x 1440)
IPS glossy with Dolby Vision, 500 nits

Maximum Memory/Storage: Up to 32 GB DDR4 2400 MHz (Onboard)
Up to 1 TB PCIe SSD

Battery: Up to 20 hours 57Wh
Rapid Charge technology available with 65W AC

Why this Device? Lightweight portability combined with heavyweight performance

Make the Shift Today!

Don't allow outdated devices to let your hard work go by the wayside. By making the switch to a modern Lenovo device with Windows 10 Pro and the Intel® vPro™ platform, you are equipping your business with the security, productivity and manageability it needs to thrive in today's market. Shift now, thrive tomorrow.
